## THE DAIRY PRACTICES COUNCIL®

### Educational Guidelines Annual Conference Memberships

DPC is a nonprofit organization of education, industry and regulatory personnel, concerned with milk quality and regulatory uniformity

#### The DPC Mission:

*To develop and disseminate uniform educational guidelines for proper and improved procedures in the production and processing of milk and milk products under a cooperative effort of educational, industry and regulatory members.*

#### The Dairy Practices Council®

## Dairy Practices Council Guidelines

### *Addressing Dairy Procedures & Policies from Cow to Cup!*

The Dairy Practices Council Guideline development and update process is unique and requires several levels of peer review. The first step starts with a **Task Force** subcommittee made up of individuals from industry, regulatory and educational institutions interested in and knowledgeable about the subject to be addressed. "White copy" drafts are circulated until all members of the subcommittee are satisfied with the content. The final "white copy" may be further distributed to the entire Task Force; DPC Executive Board; state and federal regulators; educational and industry members; and anyone else the DPC Executive Vice President and Task Force Director feels would add strength to the review. Following final "white copy" review and corrections, the next step requires a "yellow cover" draft to be circulated to representatives of participating Regulatory Agencies referred to as "Key Sanitarians." Key Sanitarians may suggest changes and insert footnotes if their state standards and regulations differ from the text. After final review and editing, the Guideline is distributed in the distinctive DPC "green cover" to DPC members and made available for purchase to others. These guidelines represent our state of the knowledge at the time they are written. Currently, DPC Guidelines are primarily distributed electronically in pdf format without colored covers, but the process and designation of the steps remains the same.
